

Felismina Moreira

Felismina Moreira is graduated in Chemical Engineering (2007) of the School of Engineering of the Polytechnique School of Porto, has a Master degree in Chemistry and food safety technology (2009) of the Faculty of Science of the University of Porto, and received her PhD in Sustainable Chemistry (2013) from the Faculty of Sciences and Technology of the New University of Lisbon, Portugal. She presently holds a post-doctoral researcher position at BioMark Sensor Research, in the School of Engineering of the Polytechnique School of Porto. Her research interests are devoted to the development of (Bio)sensors based on surface confined molecularly imprinted.
